

db

the quiet fan

With an evenly distributed column of air, the 'DB' is the only high-velocity "quiet fan" on the industrial market today. This innovative, distinctly sleek design requires minimum space, while emulating the performance of our most popular 18" fan, the industry standard in pick module applications. Conceived with distribution and fulfillment centers in mind, this low-profile unit seamlessly combines the need for increased air movement with the noise reduction requirements commonly found in today's modern pick modules. **You asked... we listened... the DB was crafted.**
