

The 500 Series Fan Controller gives users the capabilities needed to get the most out of their fans. Offering advanced control for up to 30 fans over an Ethernet-based network that includes power for the controller. Easily manage each fan's operations from the 5" PCAP touchscreen with a clean graphical visualization of speed and direction.

- Simple intuitive user Interface to control up to 30 fans.
- Password protection for scheduling, grouping, and fan naming.
- BMS Integration with optional gateway.
- Quick install, no additional power necessary.
