NOTE: The Schlage and Corbin Russwin are non-stock options.

MORE INFORMATION

- A standard WireCrafters hinge door either comes with a padlock lug and the customer provides their own padlock or a built in mortise key lock.
- Typically the person entering the partitioned area inserts the key and then grabs the wire mesh and pulls the door open. However, a door handle is a much cleaner, aesthetically pleasing, option to provide your customer.
- Door levers counter the drawback of door knobs when it comes to the strength and dexterity of the user.
