

Wastewater Treatment

Streamlining wastewater treatment operations with precision manufactured stair and platform systems

ErectaStep's robust and modular products are ideal for wastewater treatment plant facilities. Due to their complex and evolving infrastructures, these environments often require durable, reliable, and flexible access solutions. Our OSHA-compliant access stairs, work platforms, and crossovers offer an ideal solution.

Comprising of industrial-grade aluminum components, that bolt together with no welding required, allowing for unlimited configurations. This adaptability enables safe and efficient access to various parts of the facility, including elevated platforms and machinery. The system's reconfigurable nature means that as the facility changes or expands, the access solutions can be easily adjusted or expanded to match. Furthermore, the weather-resistant aluminum used in the construction of our products ensures longevity and low maintenance, even in the moist and corrosive environment of a wastewater treatment plant

OSHA COMPLIANT

MODULAR DESIGN

EASY TO INSTALL

Features

- Pre-Engineered & manufactured
- Modular
- Easy installation
- No hot permits needed
- Reconfigurable
- Code compliant
- Low maintenance
- 100% aluminum
 - Durable long lasting
- Corrosion Resistant
- Slip-resistant decking

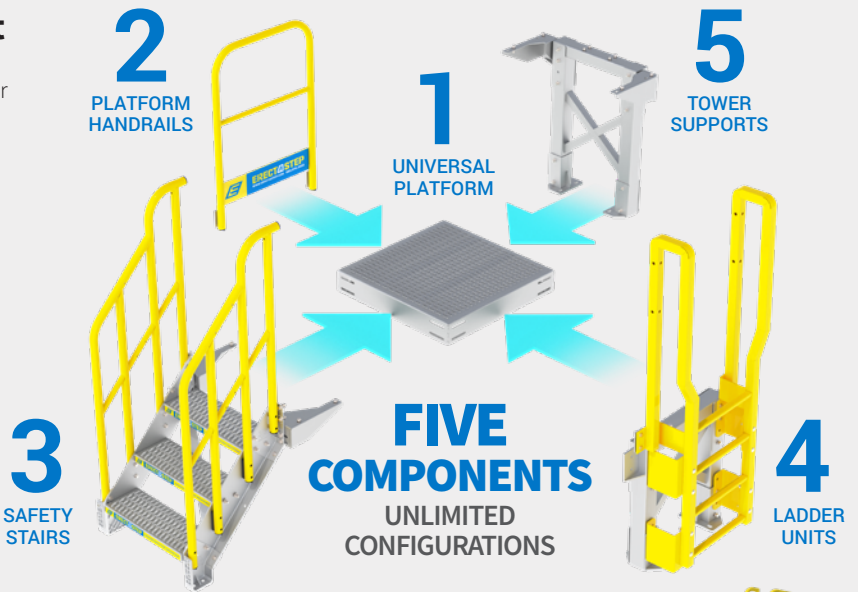

Modular stairs to simplify your project

Five simple components can create unlimited configurations. Our aluminum stairs and access systems can be configured to meet any application. Customized components available to meet the needs of your specific design.

CONFIGURE. SHIP. INSTALL.

- Configure in seconds
- Order today install tomorrow
- Construct with ease
- Bolt together design
- Sustainable

Crossovers

ErectaStep's OSHA-compliant Crossover Stair is a durable and versatile solution for wastewater treatment plants. Designed for the complex environment of these facilities, it allows for safe navigation over pipes and retaining walls.

Maintenance Platforms and Catwalks

ErectaStep's Maintenance Platforms and Catwalks offer a practical and safe solution for routine tasks in wastewater treatment facilities. Built from sturdy, industrial-grade aluminum, these OSHA-compliant structures are designed to withstand harsh environments.

Stair Towers

Our Stair Towers provide a secure and efficient solution for accessing high-level areas in facilities such as the tops of large tanks, or as secondary exits. Constructed from industrial-grade aluminum, these OSHA-compliant towers are built to withstand demanding conditions.
