DynamicRoll® **MS150** is a roll up door for applications where a protective mechanical barrier is needed to protect machineries and automated lines. Equipped with a **safety micro switch** installed in the bottom part of column (accessible), that assures a signal of door closed separately to the control panel.

The curtain is equipped with lateral zippers that assures the sealing of all door columns full height, for ideal protection.

- The door complies with the machinery directive **2006/42/EC** and the directive **2014/30/EU (EMC)**.
- Safety of control circuits **PL D (Performance Level)** according to **EN 13849-1** or **SIL 2 (Safety Integrity Level 2)** according to **IEC 62061**.
