TRAILER STABILIZERS

DOCK ACCESSORIES

Stabilizer Stand shown holding up trailer

Heavy Duty Trailer Stabilizer shown under trailer

The Allied Solutions **Heavy Duty Trailer Stabilizer** is used to support and level the trailer while it is sitting unsupported by the tractor during loading and unloading or for storage. The Heavy Duty Trailer Stabilizer creates a stronger, more stable loading environment.

The Allied Solutions **Stabilizer Stand** does what no single post solution can do. With twin, weight-bearing posts; one positioned on either side of the trailer, the Stabilizer Stand helps eliminate both trailer up-ending and trailer tip-over.

Both trailer stabilizers are finished in bright yellow for quick identification by drivers and dock workers.
