

# MORE THAN A SAFETY CABINET

**Strong Hold goes beyond fire protection to provide a solution that won't fail in your time of need—or any other day of the week.**

Manufacturing is brutal. Replacing old, worn-out equipment is just another part of the job. But it doesn't have to be. At Strong Hold, our products are built to last and our safety cabinets are no exception. We combined heavy-duty steel and innovative design to handle the abuse commonly found in the manufacturing world. Each feature was intentionally designed to increase durability and make your job easier.

# WHAT MAKES IT A STRONG HOLD

## 14-Gauge Doors >

Our doors are made with a thicker steel than what the other guys use. Whether it's standard daily abuse or a rogue fork truck, our doors can take a beating.

## Heavy-Duty Leaf Hinges >

We weld 8-gauge leaf hinges straight to the doors for a smooth closure that holds up year after year. Other hinges can break down over time, causing the doors to sag or break off completely.

## 14-Gauge Shelves >

With an industry-leading shelf capacity of 600 lbs. each, sagging will never be an issue. They're adjustable, so you can customize your organization and maximize your space.

## 7-Gauge Legs >

The legs create a space between the cabinet and the floor to minimize the risk of the bottom rusting out. Each leg includes a 3/4" hold for anchoring.

## Forklift Pockets >

We make it convenient (and safe) to move your cabinet around. Forklift pockets help prevent tipping while the forklift is in motion.

## Drain Plug >

Any leaks or spills can be easily controlled by removing the drain plug, so you can keep your cabinet in the best possible condition.

## Industry-Leading Warranty >

Our cabinets are built to last. That's why we back our safety cabinets with a 15-year warranty.

# FLAMMABLE SAFETY CABINETS

## MANUAL-CLOSE DOORS

PRODUCT NUMBER	CAPACITY	DIMENSIONS (W x D x H)	OAH	SHELVES	WEIGHT (lbs.)
6-FS-MC-1	6 Gallon	24" x 18" x 19"	19"	1	93
