

# Model 272

## Motorized Ingot/Slab Swivel Grab

This screw-type grab allows for handling of a wide range of ingots. Additional grip force is applied by the wedge action of the points when the load is lifted. This unit is designed to grip an ingot in the vertical position and lay it down to the horizontal position. Grabs are custom designed per application.

### Product Features:

- Screw drive for a wide range of ingot widths
- Bronze drive nuts for long life and smooth operation
- Wedge action applies grip force
- Low-headroom design
- Close tolerance machined slide beam and grip arms
- Heavy-duty worm gear reducer
- Designed for ease of maintenance
- Heavy-duty drive guards
- AC power

### Product Options:

- Powered rotation with or without stops
- Integral weighing system
- Maximum open/minimum closed limit switches
- Swivel rest arms for proper rollover clearance
- Heavy-duty function indicator lights
- Wedge locks
- DC power
- Electrical reversing motor controls
