# THE CONCEPT

## OPTIMIZE YOUR STORAGE SPACE AND SAVE UP TO 50% OF YOUR SPACE!!

- Increase security
- No need to relocating to a bigger facility
- Organize your items better
- Static units are mounted on mobile carriages.
- Mobile carriages travel on tracks.
- Mechanical-assist or powered systems control to open the desired aisle.

## MONTEL HIGH-DENSITY GROWING SYSTEMS MAXIMIZE THE USE OF AVAILABLE SPACE:

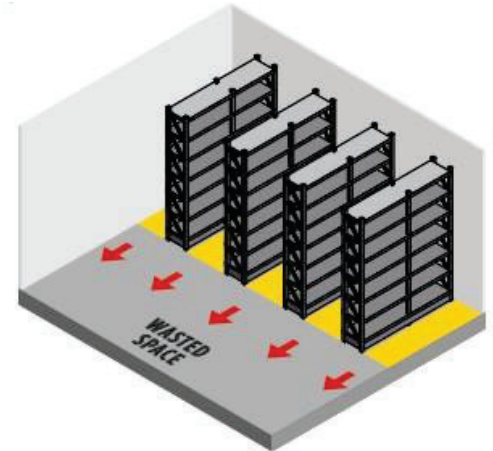

- Whether to increase storage capacity.
- Free up room for production or other uses.
- Get ride of space you do not need to pay for.

## SAVE SPACE, TIME AND MONEY.

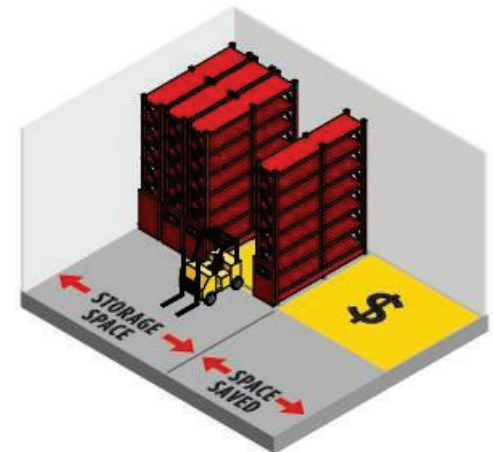

### WASTED SPACE CONVENTIONAL FIXED RACKING LAYOUT.

Conventional storage systems require space-wasting fixed aisles.

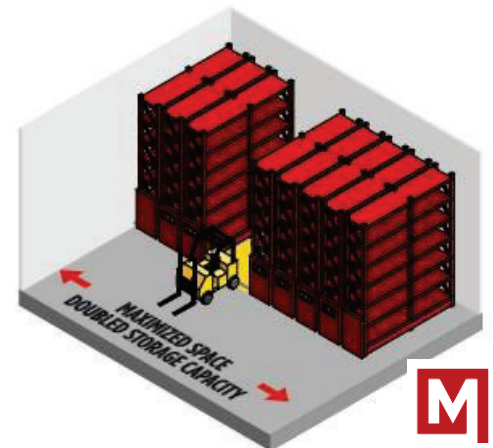

### SPACE SAVED & INCREASED PROFITS MOBILE STORAGE LAYOUT

Montel's high-density storage systems save up to 50% of your floor space in most cases, and accommodate growth for other uses while increasing revenue.

### DOUBLED STORAGE CAPACITY. MAXIMIZED SPACE & INCREASED PROFITS MOBILE LAYOUT.

100% greater storage capacity within the original floor space, eliminating the need for a costly expansion or the construction of a new facility.

# CASE STUDIES

## ZENITH AVIATION

Zenith Aviation can now fit three times as many parts in the exact same amount of space, no renovations or expansions necessary.

In order to optimize cubic footage, distributors benefit from all vacancies, including the biggest of them all: the aisles. And by replacing static racking with a mobile installation, converts don't sacrifice any of their weight capacity. Think about all the opportunities that extra room affords. Space, after all, is the service a distributor offers and sells. More of it means greater profitability.

**Location:** Fredericksburg, Virginia, US

**Montel Product:** SAFERAK 32P

## AIRBUS

This smart storage installation didn't result in any extra construction or additions to the Ashburn facility and integrated smoothly into day-to-day functions.

The implementation of Montel's powered mobile racking combines 60,000 square feet of traditional storage space into 30,000 feet of smart space without moving any walls or consuming more space. The system has the capacity to move more than 2.8 million pounds at any given time.

**Location:** Ashburn, Virginia, USA

**Montel Product:** SAFERAK 32P

# CASE STUDIES

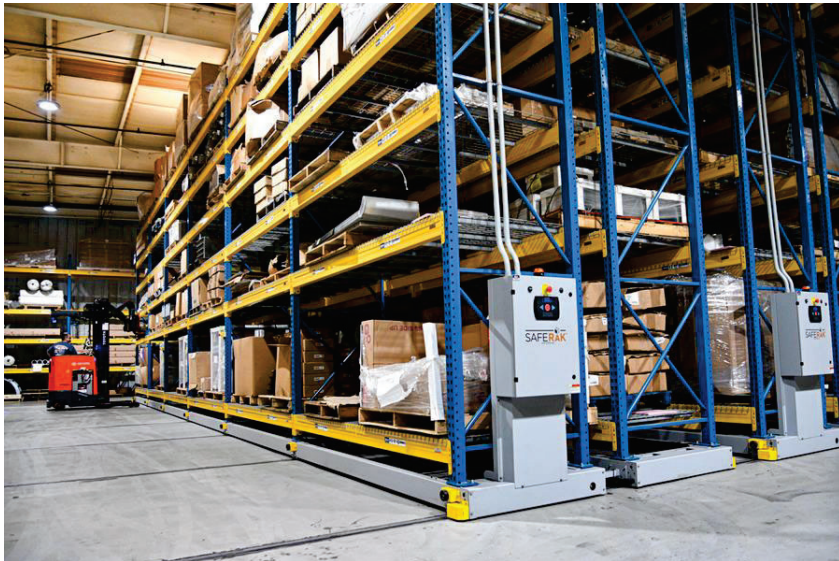

## MILLER INDUSTRIES

Thanks to careful planning and collaboration between teams at Montel and Miller Industries, Miller was able to decrease its storage footprint to 25,000 square feet.

Consequently, they can now keep all their winches, valves, hosing, and other materials at a single facility. No more unnecessary off-site storage or costly trips between locations..

**Location:** Ooltewah, TN, USA

**Montel Product:** SAFERAK® 32P AND SAFERAK® 60P

## OXFORD DODGE

After years of storing tires in outdoor shipping crates, which exposed the stock to cold temperatures during the winter and made it difficult for employees to track down the right tires for their customers, Oxford Dodge decided it was time to bring everything indoors and try to solve these issues of storage once and for all.

Montel's powered mobile racking system paired well with the new warehouse and gave the opportunity to store their tires in a way that made sense to them.

**Location:** London, Ontario, Canada

**Montel Product:** RACK&ROLL 8P

# HIGH-DENSITY INDUSTRIAL STORAGE SYSTEMS

**MOBILEX®**

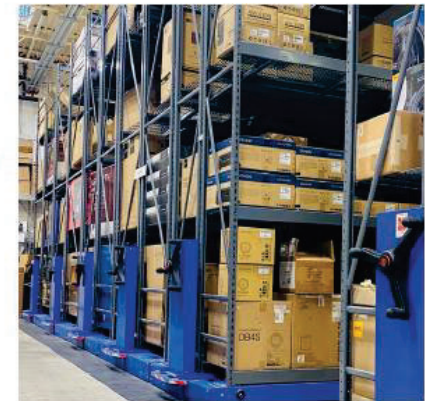

**SAFEAISLE®**

**BULK&ROLL™**

**HD 16MA**

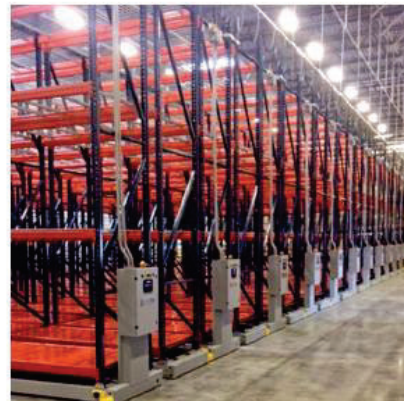

**RACK&ROLL™ 8MA**

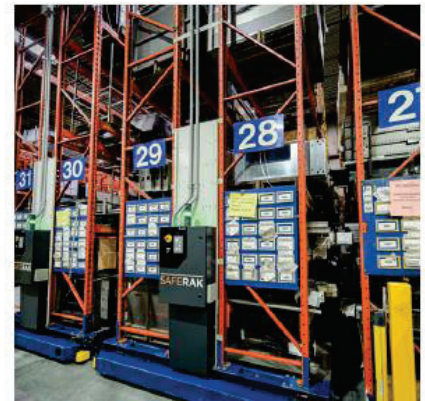

**RACK&ROLL™ 8P**

**SAFERAK® 16P**

**SAFERAK® 30P**

# BULK & ROLL

## LIGHT DUTY MECHANICAL-ASSIST MOBILE RACKING SYSTEM

Montel's BULK&ROLL mobile system has been developed for general storage applications of light to medium loads of bulky items.

**Backstores - Warehouses - Refrigerated backstore storage - Bulk storage in general**

Max carriage length	48'
Max load per beam	1,000 lbs
Max load capacity per bay	2,400 lbs
Max height	10'
Available depth	36", 42", 48"
Available width	4', 8'

### FEATURES & BENEFITS

#### Aluminum rails

Easy install and cleaning, rust free.

#### Glass-filled nylon durable wheels

Great weight capacity, light, chemicals\* and water resistant, recycled material.

#### Stainless steel ball bearings, wheel shafts and hardware

Improved longevity and rust resistance.

#### No side member

Better reach for employees.

#### Mechanical handle

Comfortable and safe operation.  
Integrated push-button lock.

#### Confined chain mechanism

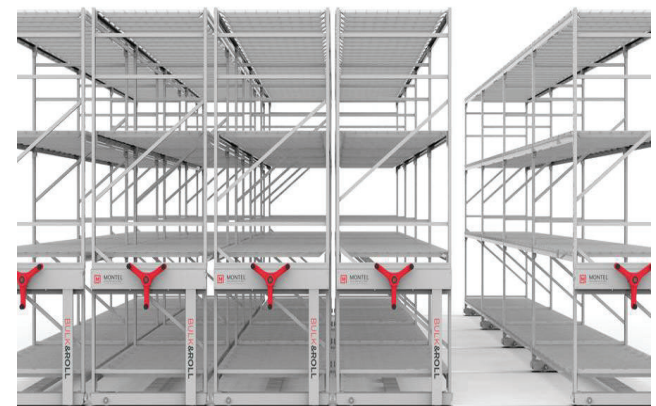

Operation safety by hiding moving parts.

#### Single rail operation - optional

Possible to use only one rail, simple installation, work in various conditions.

#### 4D wide span light-duty racking

Lightweight wire mesh decking.

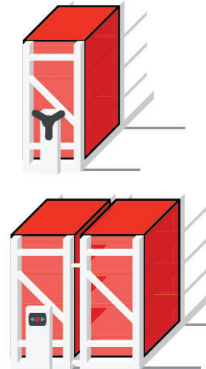

# RACK & ROLL 8MA / 8P

## SEMI-INDUSTRIAL MOBILE STORAGE SYSTEM

RACK&ROLL mobile carriage is available in both mechanical-assist (8MA) and powered (8P) versions. The system is designed for wide span semi-industrial applications.

**Distribution center - Warehouses - Service operation environments - Tire storage (tire rack)**

Load per single-bay	-	8,000 lbs
Load per double-bay	-	16,000 lbs
Load per carriage	-	24,000 lbs
Load per carriage POWERED	-	60,000 lbs
Bay depth	24"	60"
Bay width	3'	12'
Carriage length	-	45'
Height	-	20'

### FEATURES & BENEFITS

#### "C" shaped side members

Excellent carriage stiffness and longevity.

#### Dual flanged structural wheels

High support and continuous rail guidance.

#### Flange sealed bearings

Longevity and dust protection.

#### Custom anchor plates

Varied 4D wide span and tire rack dimensions.

#### Easy operation

3-button control, PIN code, touchscreen tablet, remote monitoring.

#### Customizable aisle behavior

Improved control, organization, productivity and workflow.

#### Safety features

Lock aisles, laser detection stopping movements.

#### Custom anchor plates

Varied 4D wide span and tire rack dimensions.

# HD16 MA

## SEMI-INDUSTRIAL MECHANICAL-ASSIST MOBILE RACKING SYSTEM

Designed for medium to heavy loads for very deep carriages in demanding environments where sturdiness and reliability is essential.

Distribution center, Warehouses, Service operation environments

Load per single-bay	-	16,000 lbs
Load per double-bay	-	-
Load per carriage	-	24,000 LBS
Bay depth	36"	96"
Bay width	4'	8'
Carriage length	-	50'
Height	-	20' to 24'

### FEATURES & BENEFITS

#### Mechanical handle

Comfortable and safe operation.  
Integrated push-button lock.

#### Confined chain mechanism

Operation safety by hiding moving parts.

#### “C” shaped side members

Excellent carriage stiffness and longevity.

#### Custom anchor plates

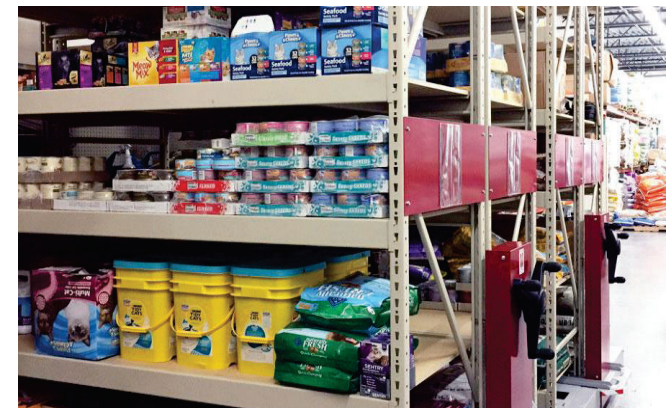

Varied shelving and racking dimensions.

#### Dual flanged structural wheels

High support and continuous rail guidance.

#### Powder coated steel rail with narrow channel

Abrasion resistance, reduces debris accumulation, easy cleaning.

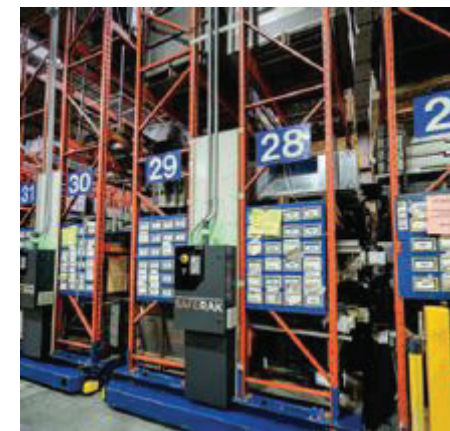

# SAFERAK

## HEAVY-DUTY INDUSTRIAL POWERED MOBILE RACKING SYSTEM

SAFERAK® heavy-duty powered mobile racking system, of industrial level, enhances efficiency and productivity by optimizing storage space.

Distribution centers – Manufacturing – Aerospace – Automotive – Defense

### SAFERAK 32P

Load per single-bay	-	16,000 lbs
Load per double-bay	-	32,000 lbs
Load per carriage	-	256,000 lbs
Bay depth	36"	96"
Bay width	6'	12'
Carriage length	-	100'
Height	-	24'

### SAFERAK 60P

Load per single-bay	-	30,000 lbs
Load per double-bay	-	60,000 lbs
Load per carriage	-	480,000 lbs
Bay depth	36"	96"
Bay width	6'	12'
Carriage length	-	120'
Height	-	24'

# SAFERAK

## HEAVY-DUTY INDUSTRIAL POWERED MOBILE RACKING SYSTEM

**SAFERAK®** heavy-duty powered mobile racking system, of industrial level, enhances efficiency and productivity by optimizing storage space.

**Distribution centers – Manufacturing – Aerospace – Automotive – Defense**

### FEATURES & BENEFITS

#### Heavy duty carriages

Increased strength, stiffness and durability.

#### Low profile mobile

Prevents objects from getting jammed and toe safety.

#### Entirely customizable

Control aisle behavior for improved productivity and safety.

#### Industry 4.0 ready

Smart factory compatible to drive production efficiency and data integration.

#### New keypad

Simplified

Preprogrammed aisle

Siemens components – readily available

#### New HMI controller

Touchscreen

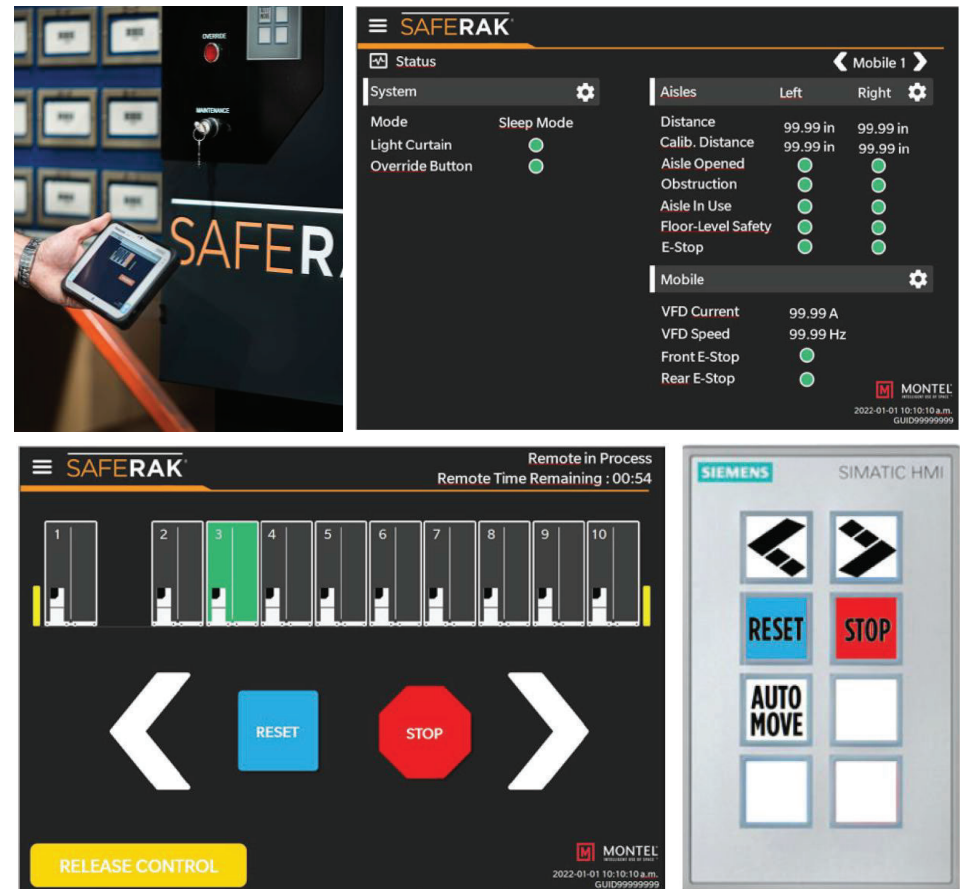

Remote control (phone, tablet, laptop)

Onscreen configuration, control and diagnostic

Remote troubleshooting (VPN optional)

Can be connected to fire alarm system

Siemens components – readily available

SMARTSHELF® 4-POST SHELVING SYSTEM WITH BIN DIVIDERS

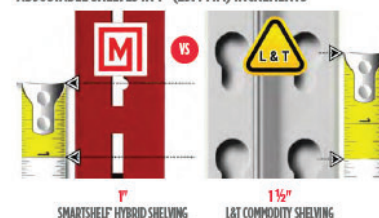

## GET MORE VERTICAL & HORIZONTAL SPACE

TAKE SPACE EFFICIENCY TO A NEW LEVEL | MAXIMIZE YOUR STORAGE | OPTIMIZE YOUR SPACE

Our continuous quest for space optimization has led us to develop SmartShelf®, a shelving system that exceeds industry standards.

### MORE STORAGE VERTICALLY

ADJUSTABLE SHELVES IN 1" (25.4 MM) INCREMENTS

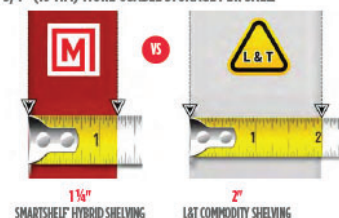

SMARTSHELF® HYBRID SHELVING SYSTEM WITH HOOKS

L&T COMMODITY SHELVING

### MORE STORAGE HORIZONTALLY

3/4" (19 MM) MORE USABLE STORAGE PER SHELF

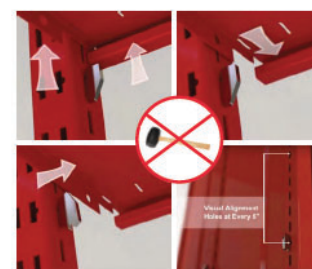

SMARTSHELF® HYBRID SHELVING

L&T COMMODITY SHELVING

## EASY TO ADJUST A SHELF

SAVE SPACE | SAVE TIME | SAVE MONEY

### SHELVING SYSTEM WITH HOOKS: EASY TO RECONFIGURE & NO TOOLS REQUIRED

The SmartShelf® exclusive hook shelf support system provides the quickest and greatest ease of assembly, disassembly, and reassembly.

No tools, hammers or mallets needed to install, remove, or reconfigure shelves as necessary with industry typical shelf support systems.

The shelves can be conveniently put in or taken out without adjusting, tilting, or removing the shelves above or below since the box-formed posts do not impede the front of the shelf. The slide-in & slide-out capability truly reduces the time and effort to reconfigure the shelves, as there is no handling of the various shelf components.

Additionally stored objects are protected from disruption on the adjacent shelves below.

### STANDARD DIMENSIONS

BACK-TO-BACK SHELF (DEPTH)	8"	9"	10"	12"	13"	15"	16"	18"	24"	30"	36"
DOUBLE FACE FULL DEPTH SHELF (DEPTH)	16"	18"	20"	24"	26"	30"	32"	36"			
WIDTH	24"	30"	36"	39 3/8"	42"	48"					
HEIGHT	76"	85"	88"	97"	108"	120"					

# HIGH-DENSITY INDUSTRIAL STORAGE SYSTEMS

## BEST OF BOTH WORLDS

EXCLUSIVE BACK-TO-BACK AND DOUBLE FACE FULL DEPTH SHELF TECHNOLOGY

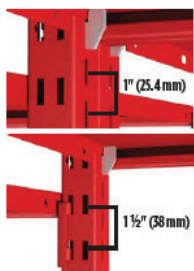

### TWO TECHNOLOGIES WITHIN A SINGLE POST FRAME

SmartShell® is the only storage system that can be configured as back-to-back or double face full depth shelf, or any combination of both from one tier to the next, and from one shelving section to the other. This exclusive flexibility allows the storage of objects in various shapes, forms, and dimensions.

This unique patented boltless shelving concept provides two alternatives which you can mix and match for endless storage possibilities:

- Shelving system with hooks requiring no tools for shelf adjustment capable of withstanding a load capacity of up to 300 lb per shelf
- Shelving systems with shelf supports & reinforcements capable of withstanding a load capacity of up to 500 lb per shelf

### SHELVES ARE ADJUSTABLE BY 1" (25.4 mm) INCREMENTS WITH HOOKS, OR BY 1 1/2" (38 mm) INCREMENTS WITH SUPPORTS

- Adjustments for storing objects of various heights. Offers more adjustability and optimizes the space between each level of shelving
- Hooks and supports can be used in the same section

Patent No. 6,814,245

## DESIGN FEATURES

### SHELF SUPPORTS (OPTIONAL)

These supports are available in 3/4" (19.5 mm) or 1 1/4" (31.75 mm) height, according to the application and required load, and adjustable on 1 1/2" (38 mm) increments. They are made of 12-gauge (2.66 mm) steel. Safely supports the shelves and allow for the addition of reinforcements. Increases rigidity

### SHELF REINFORCEMENTS (OPTIONAL)

Shelf reinforcements are inserted in the longitudinal supports. The number of supports depends on the width of the shelves and the weight of the items to be stored

### FOUR ROLL-FORMED SHELF FOLDS

- The fourth fold reduces the risk of injury, protects documents or objects, and makes the shelves sturdier
- The 3/4" (19.5 mm) shelves are made of 20" (508 mm) or 18" (457 mm) gauge steel
- The 1" (25.4 mm) shelves are made of 18-gauge steel

### INTEGRATED LEVELERS

Unilite shims, integrated levelers ensure accuracy, stability and a safe working environment on uneven floors.

### CLOSURE PANELS OR END DIVIDERS (OPTIONAL)

Closure panels extend into the shelf area. Prevent stored objects from falling behind the closed-post upright. End dividers provided with slotted shelves are a more economical alternative.

## INDUSTRIAL MODULAR DRAWERS

### MODULAR DRAWERS LOAD CAPACITY:

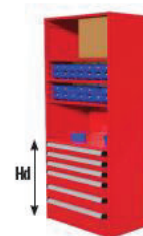

- 400 lb load capacity industrial-grade drawers
- 200 lb load capacity commercial-grade drawers

### CONSIDERATIONS:

- Drawer handles overhang by about 2 inches
- Consider wider bumpers when on mobile carriages
- Minimum of 2 anti-tip rails if used on mobile carriages
- Maximum height for drawers-in-shelving: 48 inches
- Static units anchored to floor

### LOCK-IN MECHANISM WITH HANDLE

The ergonomic aluminum handle and lock-in device procure a user-friendly experience in a sturdy unit.

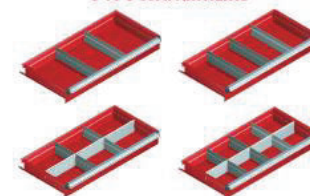

(14) BANK OF DRAWERS HEIGHT: 24", 36", 48"
