R MOBILE CABINET

Rousseau's R Heavy-Duty Mobile Cabinet is one of the safest and most secure on the market. With a simple upward movement with just one hand on one of the drawer's ergonomic handles, the drawer opens with incredible ease, and the lock-in mechanism is activated so none of the other drawers can open.

It is also easy to change the cabinet configuration as the drawer order can be changed at any time. Our specialists will be happy to help you configure a cabinet personalized for you and tailored to your customers' specific requirements.

The R Heavy-Duty Mobile Cabinet is manufactured to meet the rigorous demands of industrial applications and is therefore one of the most durable on the market. Our research and development department has put the cabinet through multiple demanding tests for load capacity, impact resistance, and wear and tear, so we are confident in its excellent durability. Fitted with high-quality, resistant casters, it has been designed for intensive use in harsh work environments.

There is also an extensive range of options and accessories available to further customize it to your needs. There are 6 different tops, 2 types of handle (on the front and side), foldaway shelves and hanging side cabinets. Furthermore, you no longer need to worry about replacing complete units as your business grows and evolves because these options and accessories can be easily retrofitted.

The unique design of the R drawer is a trademark of Rousseau Metal Inc.

The L Compact Stationary Cabinet has been developed to better meet our customers' needs in terms of dimensions offered, drawer configurations and accessories that fit in a compact cabinet.

The L Compact Stationary Cabinet is 18" wide and comes in two depths (21" and 27") and five heights (24", 28", 30", 34" and 40"). A 2" or 4" painted steel or stainless steel base can also be added to raise the cabinet height slightly or to create more space for feet. With the security system, you can lock all the drawers with a single action.

There are 6 different drawer heights available from 3" to 12", and the drawers can be accessorized with partitions, dividers and plastic bins for optimal organization of your parts. Each drawer has a 100lb. load capacity and an ergonomic, easy-grip handle.

SUBDIVIDING R DRAWERS

COMPARTMENTS

CALCULATE THE DIMENSIONS OF A COMPARTMENT

- Usable width of a drawer: subtract 4½" from the nominal width (e.g., 36"W - 4½"W = 31½"W)
- Usable depth of a drawer: subtract 3½" from the nominal depth (e.g., 18"D - 3½"D = 14½"D)
- Compartments: Usable width is calculated by subtracting ½" from the nominal width of the divider (e.g., for a 5"W divider: 5" - ½" = 4½"). For the usable depth, see the diagram opposite

COMPARTMENTS

EXPLANATION OF THE DRAWER DIAGRAMS

- Slots on the drawer sides: green lines
- Slots across the width (left-right): 1" increments. Drawers with an odd-numbered midpoint have extra slots at certain $\frac{1}{2}$ " intervals. The slots start 3" from the left or right edge
- Slots along the depth (top-bottom): $\frac{1}{2}$ " increments. The slots start 2 $\frac{1}{2}$ " from the front or back edge

LAYOUT DESIGN

- Print out the page with the desired dimensions
- With a ruler and pencil, draw the layout
- Count the number of partitions and dividers needed for the desired layout and make a note of them in the appropriate spaces

PARTITION NUMBERING SYSTEM - SEE PAGE 38

- Depth: RG00-DDHH, or DD = nominal drawer depth, and HH = nominal partition height
- Width: RG01-WWHH, or WW = nominal drawer width, and HH = nominal partition height
- On each page, the drawer depth (front to back) or width (left to right) is specified in the product number columns
- Add the drawer height and number of partitions needed for your installation

- E.g., a height of 10" is written as 10, a height of 3" is written as 03, see example below. The product number of a front to back partition that is 3" high would be: RG00-2403

- E.g., the product number for a 6.5"W and 3"H divider will be RG10-06503, and the product number of a 10"W and 3"H divider will be RG10-10003

SUBDIVIDING L DRAWERS

COMPARTMENTS

CALCULATE THE DIMENSIONS OF A COMPARTMENT

- Usable width of a drawer: subtract $3\frac{1}{2}"$ from the nominal width (e.g., $18"W - 3\frac{1}{2}"W = 14\frac{1}{2}"W$)
- Usable depth of a drawer: subtract $3\frac{1}{2}"$ from the nominal depth (e.g., $21"D - 3\frac{1}{2}"D = 17\frac{1}{2}"D$)
- Compartments: Usable width is calculated by subtracting $\frac{1}{2}"$ from the nominal width of the divider (e.g., for a 5"W divider: $5" - \frac{1}{2}" = 4\frac{1}{2}"$). For the usable depth, see the diagram opposite

COMPARTMENTS

EXPLANATION OF THE DRAWER DIAGRAMS

- Slots on the drawer sides: green lines
- Slots across the width (left-right). The slots start 3" from the left or right edge
- Slots along the depth (top-bottom). The slots start 3" from the front or back edge

LAYOUT DESIGN

- Print out the page with the desired dimensions
- Draw the layout with a ruler and pencil
- Count the number of partitions and dividers needed for the desired layout and make a note of them in the appropriate spaces

PARTITION NUMBERING SYSTEM - SEE PAGE 7

- Depth: LG02-DDHH, or DD = nominal drawer depth, and HH = nominal partition height
- On each page, the drawer depth (front to back) or width (left to right) is specified in the product number columns
- Add the drawer height and number of partitions needed for your installation

- E.g., a height of 10" is written as 10, a height of 3" is written as 03, as in the example below. The product number of a front to back partition that is 3" high would be: LG02-2103
